

DOKA PRODUCT CATALOG

Engineered industrial products & project supply

Industrial Supply | Project Procurement | Controlled Documentation

Catalog Overview

This catalog presents DOKA's core industrial supply and drawing-based fabrication capabilities. Final material grades, dimensions, testing, coating and documentation are defined by the enquiry and project specification.

Group	Typical scope
Anchor Systems	Anchor bolts, cages, sleeves and related assemblies
Plates	Base plates, embed plates and shear keys
Fasteners	Stud bolts, nuts, washers and special fasteners
Fabrication	U-bolts, pipe supports and drawing-based parts
Project Supply	Piping materials, valves and selected equipment

Anchor Bolts & Anchor Systems

Project-specific anchor systems are coordinated around drawings, dimensions, thread forms, material grades, heat treatment, coating and documentation.

- ASTM A193 / A320 / F1554 applications
- Custom diameters and lengths
- Nuts, washers, sleeves and template arrangements
- Hot-dip galvanizing or specified finish
- Traceability and inspection documentation

Base Plates & Embedded Parts

Drawing-based plates and welded assemblies for structural steel, equipment foundations and reinforced concrete connections.

- Base plates
- Embed plates
- Shear keys
- CNC holes and slots
- Welded studs / anchors
- Dimensional inspection and coating records

Stud Bolts & Special Fasteners

Bolting packages for industrial and piping applications, including non-standard parts manufactured to drawing or specification.

- Stud bolts
- Heavy hex nuts
- Washers
- Special bolts and pins
- Alloy and stainless options
- Project-specific testing and documentation

U-Bolts, Pipe Supports & Fabrication

Fabricated components are configured around geometry, loads, material, welding, surface protection and site requirements.

- U-bolts
- Fixed / sliding / guided pipe supports
- Welded brackets and assemblies
- Machined and formed components
- Galvanized and painted finishes

Quality, Documentation & Packing

The documentation package is aligned with the approved project scope.

- EN 10204 3.1 / MTC where applicable
- Chemical and mechanical properties
- Impact testing and heat treatment when specified
- Dimensional / visual inspection
- Galvanizing or coating reports
- Manufacturer and origin documents
- Tagged sets and export packing

Request a Technical Quotation

For accurate evaluation, share drawings, bill of quantities, material grades, standards, quantities, coating requirements, delivery country and required documentation.
